- ✓ Easy to work with due to perforation
- ✓ Highly stretchable
- ✓ Extremely good adhesion
- ✓ Professional kitchens preferred choice
- ✓ Breathable, limited condensation development
- ✓ Helps chilled food maintain its original consistency

Product Description

The perforation makes it incredibly easy to work with the cling film because you do not have to cut the film yourself. The cling film can be used faster than film without perforation and you avoid unnecessary waste due to film becoming crumpled up as it is torn off the dispenser. The cling film can be used to store all types of foodstuffs and for general household purposes. However, avoid using with pure fats, oily and fatty foods. PVC cling film is very stretchable and has very good adhesion. It is therefore often the choice of professional kitchens. A key feature of PVC is that it is a breathable material limiting condensation. This helps chilled food maintain its original consistency.
