Strep A Antigen Home Test is a rapid immunochromatographic assay for the qualitative, presumptive detection of Group A Streptococcus antigens in human throat swab specimens.

About Strep A

Although anyone can get strep throat, it's most common in kids between the ages of 5 and 15. Beta-hemolytic Group A Streptococcus is a major cause of upper respiratory infections such as tonsillitis, pharyngitis, and scarlet fever.

Specimen type	Human throat swab
Detection	Group A Streptococcus antigens
Method	Lateral flow
Package	1 test/kit 200x70x25 mm
Time to results	5 minutes
Shelf life & Storage	24 months at 2~30°C
Qualification	CE 0344
